SOFTWARE DEVELOPER

Working as a business analyst has given me the ability to work with talented designers and engineers, which has provided me with invaluable experience in my pursuit in becoming a software developer. This position has enabled me to collaborate with others, lead projects, enhance my critical thinking skills, and the confidence to attack complex problems. I am passionate about learning new skills-and coming up with innovative solutions.

SKILLS

Technical: Ruby, Rails, JavaScript, Vue.js, HTML5, CSS, PostgreSQL, Git, Testing, Pair-Programming, SQL, Data Visualization, Bootstrap, Material, RSpec, RESTful APIs
Additional: Business Analysis, Digital Marketing, SEM, SDLC, Agile Management, Google Analytics, SEO, Azure DevOps, Java

P R O J E C T S

Program Support Center (PSC)- ERM Project, January 19'

January 2019, PSC required an ERM system with the capabilities of storing, routing, and tracing potential business opportunities and customer service agreements (CSA). I gathered, documented and maintained solution requirements, created user stories, and supported the technical team.
Skills: requirements analysis, user stories, process re-engineering, business analysis

Food and Drug Administration (FDA)- SharePoint Project, March 19'

March 2019, FDA required a SharePoint website re design to better streamline daily, monthly, and quarterly reporting and forecasting. I conducted a system analysis of the FDA SharePoint website, gathered requirements, created solutions, and developed potential designs.
Skills: requirements analysis, design, business analysis

Office of the Assistant Secretary for Health (OASH)- ERM Project, March 19'

March 2019, OASH required an ERM system with the capabilities of storing, routing, and tracing various document formats. OASH needed the ability to route documents internally and externally when working with outside agencies. I led requirements gathering meetings, developed workflows using BPMN, created and maintained documentation, and created user stories.
Skills: requirements, user stories, design, business analysis, HTML

Actualize Coding Bootcamp- WodUp, August 19'

Created web application for CrossFit athletes to track WODs (workout of the day), personal stats, connect with others, and submit scores and times against a global leader board that can be filtered by workout type, gender, age, country, and gym affiliate. The app was created using Ruby, Rails, Vue.js, and Postgres.
Skills: Ruby, Ruby on Rails, Vue.js, Bootstrap, HTML, CSS, PostgreSQL
